

# CLEANHAND

antibacterial processing

The microorganism-resistant  
Fapim surface coating

 Made in Italy

**fapim**<sup>®</sup>

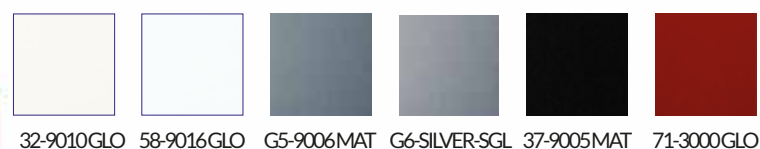

Life in evolution

**CLEAN HAND** is Fapim's new **antibacterial** surface finish.

All accessories that come into repeated contact with hands are treated with **CLEAN HAND**, a real barrier against the proliferation of microorganisms.

Finished with **CLEAN HAND** coating:

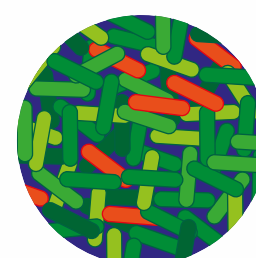

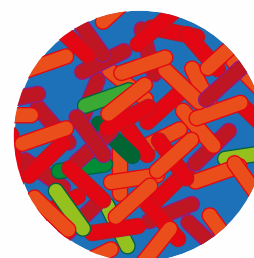

32-9010GLO 58-9016GLO G5-9006MAT G6-SILVER-SGL 37-9005MAT 71-3000GLO

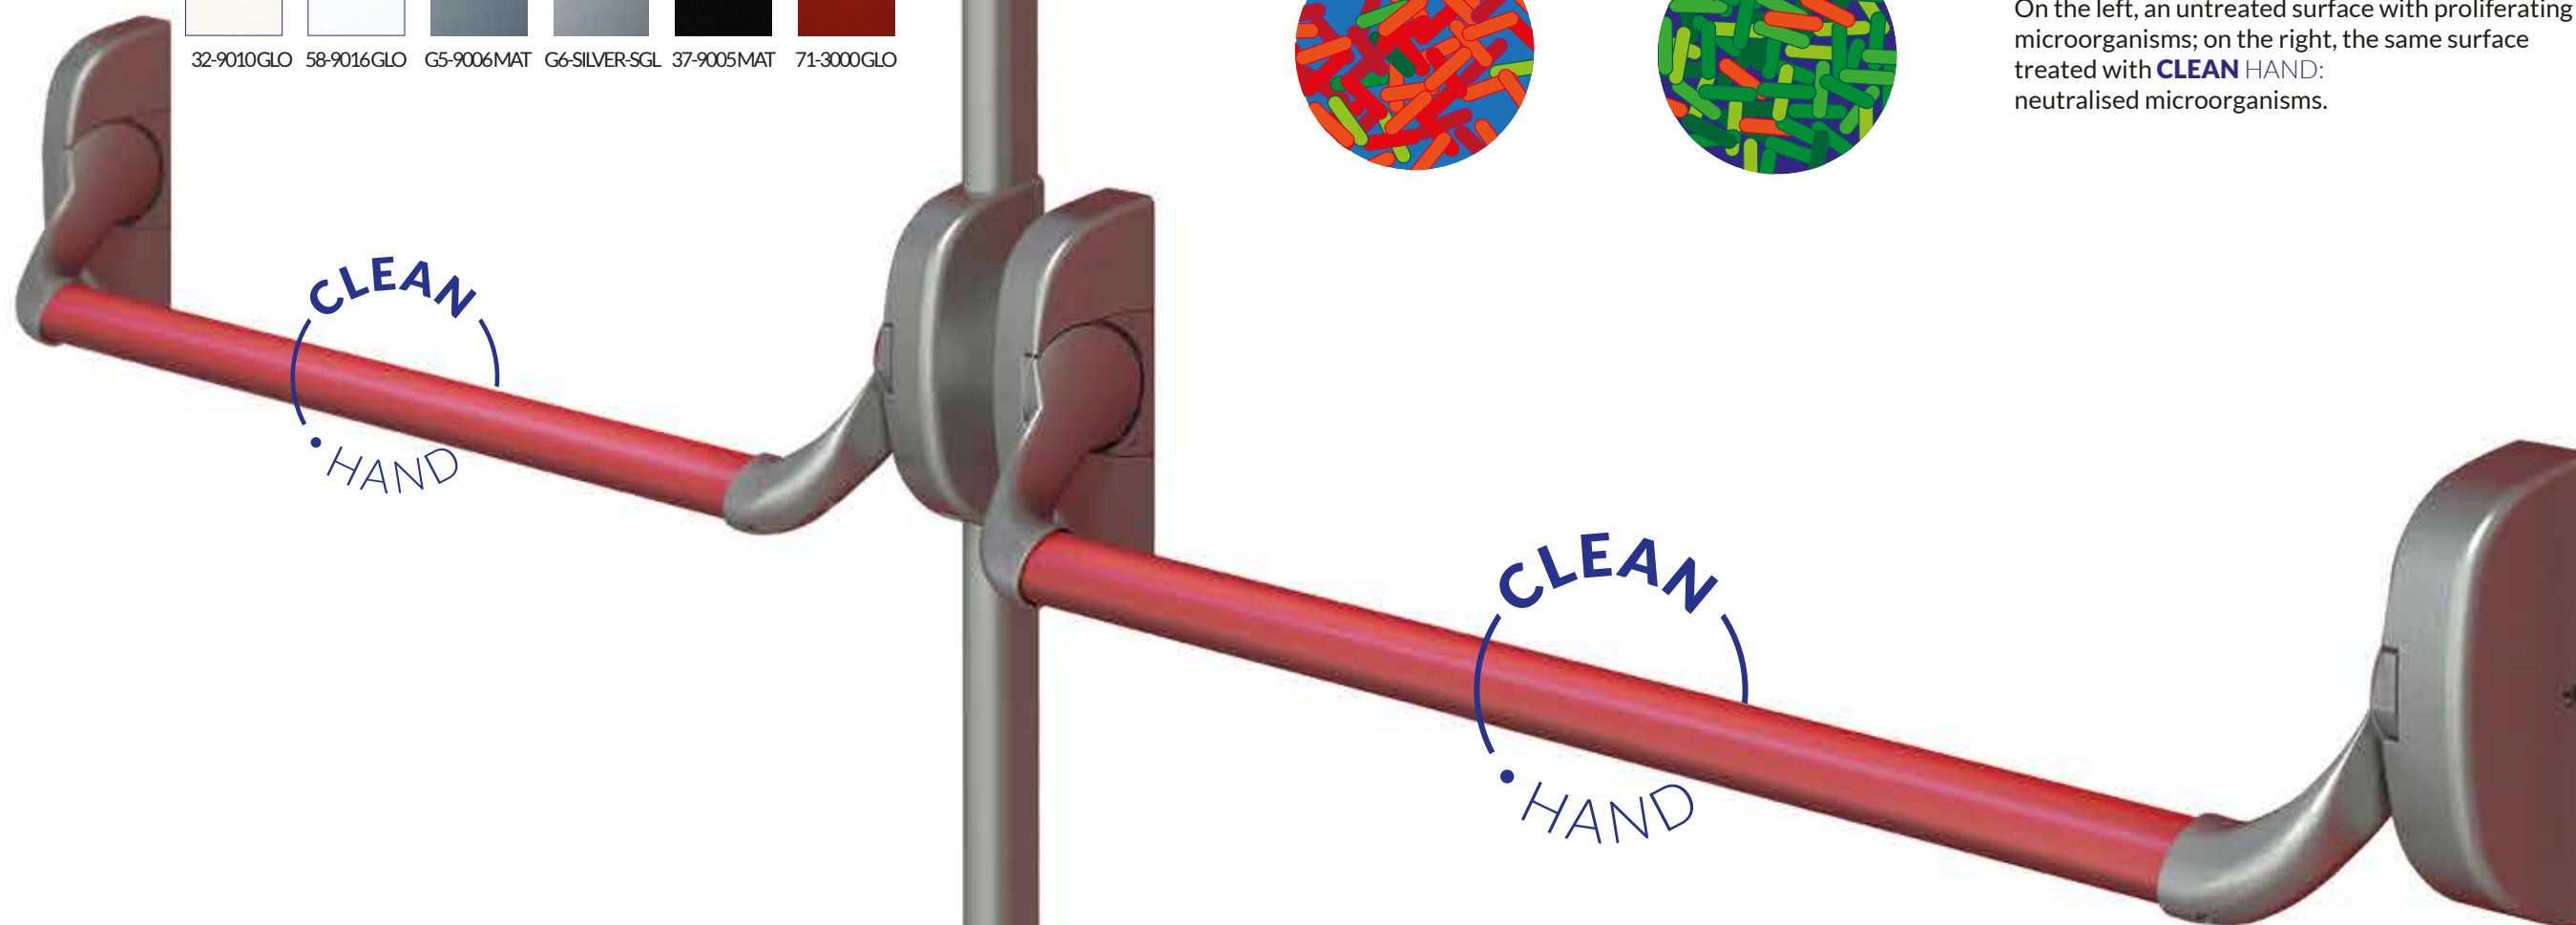

Bacteria are present everywhere and are a critical issue for public or sanitary facilities against which even thorough cleaning is not effective over time. The solution is our antibacterial paint.

**CLEAN HAND** uses a patented technology that offers coatings superior resistance to the growth of microorganisms through the emission of silver ions.

Laboratory tests have shown that the antibacterial activity of **CLEAN HAND** stabilises over **24 hours** achieving a **99-100%** reduction in microorganisms.

On the left, an untreated surface with proliferating microorganisms; on the right, the same surface treated with **CLEAN HAND**: neutralised microorganisms.

Tests performed in various European laboratories, in accordance with **ISO 22196** and **JIS Z 2801**, have confirmed that **CLEAN HAND** is effective against the main bacteria, germs, moulds and fungi that contaminate surfaces:

- Staphylococcus aureus
  - Escherichia coli
  - Pseudomonas aeruginosa
  - Enterococcus hirae
- (gram+ and gram- bacteria, moulds and fungi)

The **CLEAN HAND** surface coating is resistant to microorganisms **24 hours a day**. According to laboratory tests, one year after application the paint retains the same initial antibacterial properties despite cleaning, interfering substances and scratches on the surface.

The active ingredient in **CLEAN HAND** has a constant effectiveness over time and over **25 years**.

**CLEAN HAND** maintains a safer environment from microorganisms without sacrificing the colouring and the quality of durability and corrosion resistance of all Fapim products.
